Total Annual Savings

What is Rhythm?

Rhythm is Lingk's enterprise integration platform (iPaaS) that unifies your systems and data into one consistent flow with big data pipelines and flexible transformations. Our no-code/low-code SQL-based platform is built on a large data processing engine (Apache Spark) for instant processing of billions of rows of data.

- ✅ **Hundreds of pre-built connectors for top enterprise apps (cloud or on-prem)**
- ✅ **Automated orchestration: schedules, event triggers, conditional logic, retries**
- ✅ **Observability & alerts with intelligent duplicate prevention**
